Abstract (Basic): JP 2001002458 A

NOVELTY - A fiber substance is obtained from a mixture of cement, water, and fiber material which does not contain asbestos. Micro silica and volcanic ash are added. The micro silica has bulk density of 425 - 550 kg/m³.

USE - The cement roofing is used in civil construction.

ADVANTAGE - Bending strength and other characteristics are improved by adding micro silica to fiber material.
